

# LEPTOSPIROSIS BEST PRACTICE VACCINATION RECOMMENDATION. STOP LEPTO BEFORE IT STARTS.

## SPRING BORN CALVES

## AUTUMN BORN CALVES

\*Spring born calves require an autumn booster to align them with the herd and avoid long re-vaccination intervals.

<sup>#</sup>Any calves receiving their second vaccine before 12 weeks of age will require a third vaccination around 6 months of age to manage the potential risk of MDA interference.

R2+ includes mixed aged cows.

Turn over for working example.

## Field-to-Family Protection

# WORKING EXAMPLE & CALENDAR.

Example

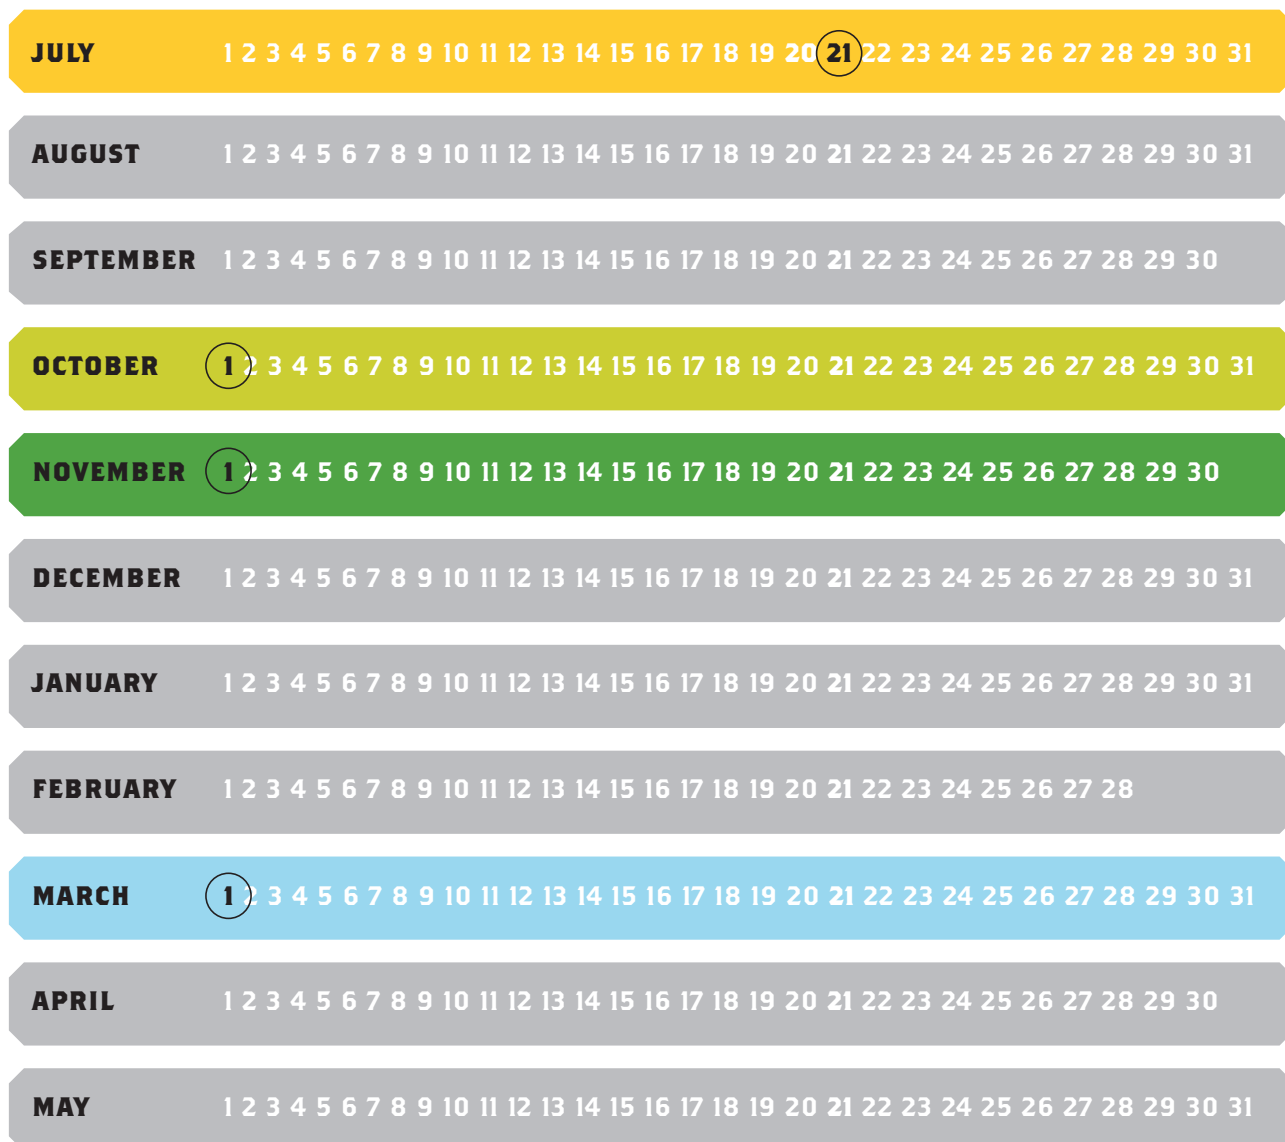

Clinic Example

- PSC - Planned Start of Calving
- Assumes a 6 week calving spread\*.
- Option: Vaccinate in batches if the calving spread is long.
