

LEPTOSHIELD®

BIVALENT LEPTOSPIROSIS VACCINE

FAST FACTS

Combined *Leptospira borgpetersenii* serovar Hardjo type Hardjobovis, and *L. interrogans* serovar Pomona vaccine.

INDICATIONS

Leptoshield is for the prevention of leptospirosis in cattle, sheep and goats. Also as an aid in control of leptosporosis in deer. Prevents urinary shedding of the *L. hardjo* and *L. pomona* when used prior to natural exposure and prevents the risk of human leptospiral infection associated with the shedding of these leptospires in the urine and from the reproductive tract of cattle.
