

**WOULDN'T IT BE  
GREAT TO MANAGE  
SCOURS WITHOUT  
CAUSING LUMPS?**

**ScourGuard<sup>®</sup> 4(K)**  
**GENTLE ON COWS. TOUGH ON SCOURS.**

# GENTLE ON COWS, TOUGH ON SCOURS.

**ScourGuard® (4)K.** For vaccination of healthy, pregnant cows and heifers to aid in the prevention of calf scours caused by Rotavirus G6 and G10, Coronavirus and *E. coli*.

Aqueous based, less reactive formulation for settled cows at administration and to avoid problems with injection site lumps.

## TOUGH BUT GENTLE.

**ScourGuard 4(K)** may be tough on scours, but its gentle formulation is easy on your cows.

## BROAD SPECTRUM.

**ScourGuard 4(K)** is the only calf scours vaccine in New Zealand containing Rotavirus G6 and G10, for truly broad spectrum Rotavirus protection, plus Coronavirus and *E. coli*.

## G6 AND G10 ALERT.

Research shows New Zealand cattle have widespread exposure to the G6 and G10 Rotavirus strains, which are both key causes of calf scours.

## HIGHLY QUALIFIED.

Clinically trialled here in NZ, **ScourGuard 4(K)** is proven to deliver rapid and long-lasting antibody responses in colostrum for maximum protection right when replacement calves need it most.

## KEEP YOUR FARM PROTECTED.

Ask your vet about protecting your herd with **ScourGuard 4(K)**.

# DOSAGE

## ScourGuard (4)K

Can be given as an annual booster vaccination to animals vaccinated with Rotavec® Corona in the previous year.

---

Previously unvaccinated heifers or cows should receive two doses at least 3 weeks apart, with the second dose given 2-12 weeks prior to calving.

---

Annual booster re-vaccination is with a single dose 2-12 weeks prior to each subsequent calving.

---

In seasonal calving herds, a booster vaccination 2-4 weeks before the planned start of calving will cover all calves born in the first 8-10 weeks of calving.
